BEL sees space electronics as next growth orbit

BEL is keen to be a part of the National Common Mobility Card (NCMC) mission.

Gowtam said: “To be a part of the mission, so far we have tested and proved many concepts with products in the country. In Ahmedabad, we have installed fare collection gates for the Metro with an open access. This can be applied to any Metro operating in the country.”

In Maharashtra, we are working with the State Transport Corporation for the supply of hand-held devices and with NHAI toll collection system for a single mobility card for pan-India usage,” he said.
